

# V6069

## 3U VPX Versal® Premium ASoC FPGA Optical I/O Module with QMC Sites

### Benefits

Heterogeneous computing card combining hard ARM processor cores, large FPGA fabric, and high-bandwidth interfaces

Designed specifically for sensor interface, digital signal processing, video processing, application co-processing, and secure networking

HPEC focus, 3U VPX, VITA 93 QMC compliance, VITA 47 compliance and SOSA aligned options

Versatile design supports electrical and optical interfaces, optical options for both backplane or front-panel I/O

Modular optics for flexibility in supporting 1-25G per lane, up to 700G

### Overview

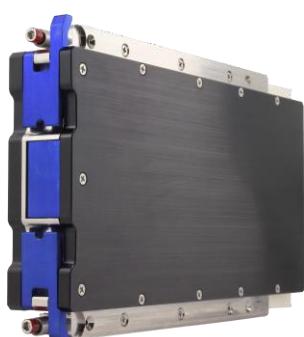

The V6069 is a next generation heterogeneous embedded computing 3U VPX module featuring the Xilinx® Versal® Premium Adaptive System-on-Chip (ASoC), rugged optical and electrical high-speed I/O, QMC sites, and SOSA aligned profile options. The V6069 provides options for Versal® Premium VP1502/VP1702/VP1552 part selection. In a single 3U VPX card, the V6069 provides up to seven 100G optical interfaces (700G aggregate), large FPGA fabric, ARM processor cores, and two QMC sites.

The V6069 excels at high-bandwidth interface applications where data is processed or pre-processed locally and then distributed across the VPX backplane or optical interfaces. Use cases include sensor interface, data processing, data distribution, and FPGA co-processing applications. Radar, signals intelligence, electronic warfare, video, storage, medical imaging, and embedded communications systems all can benefit from the V6069 module.

By leveraging the Versal® hard silicon Ethernet interfaces, PCIe controllers, DMA engines, and associated software drivers Xilinx® has enabled a robust ecosystem for high-bandwidth Ethernet performance. In addition to the Ethernet interface, the FPGA fabric provided within the ASoC part is capable of hosting New Wave DV IP cores for Fibre Channel, ARINC-818, sFPDP, Aurora, and others. This makes the V6069 an ideal hardware platform for mixed interface protocol needs or protocol bridging applications.

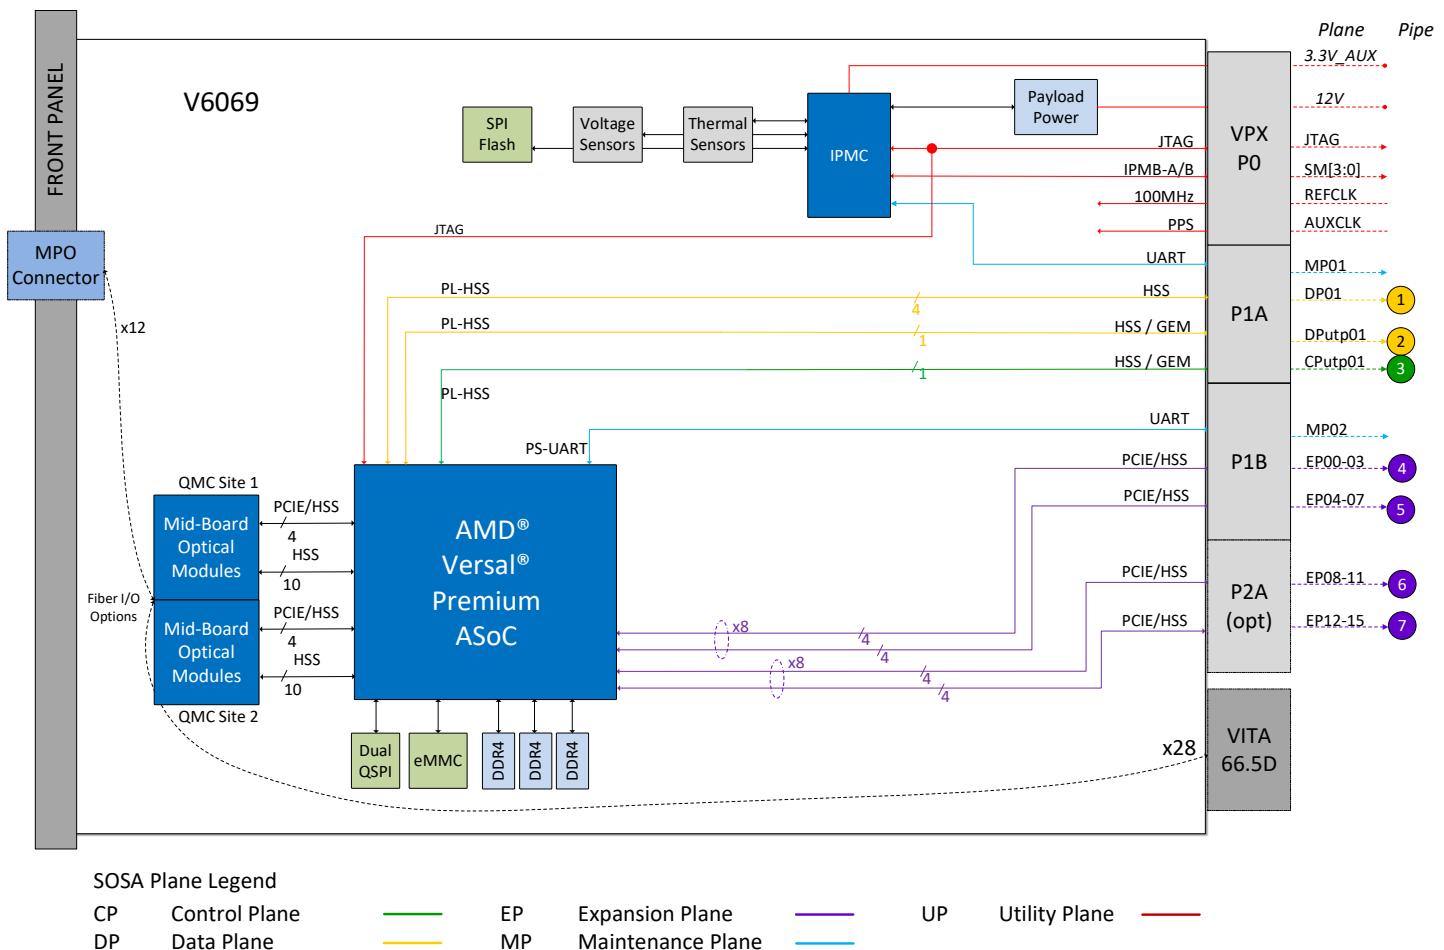

The V6069 serves as a standalone data interface and processing solution in a single 3U VPX module. The V6069 provides twenty-eight (28) full duplex optical ports supporting from 1-25G per lane, FPGA fabric resources, ARM processor cores, and two (2) QMC sites. The V6069 can also be used adjacent to CPU's and/or GPUs in a 3U VPX system. In this arrangement, the adjacent CPU's/GPUs are unburdened of the data interface overhead and can be dedicated to running high value applications and algorithms with the V6069 feeding them data directly across the backplane.

The inclusion of an QMC sites enables customization and flexibility to meet specific application requirements, such as multi-level security or secure boot. Further, this configuration supports scalability and future QMC module upgrades to increase performance or add new functionalities long into the product's life.

## Optical Connector Options

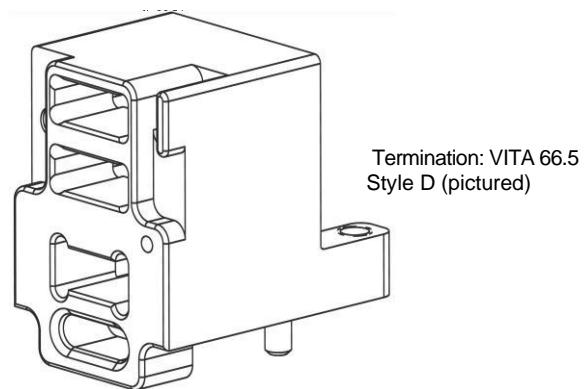

The V6065 offers three different optical I/O options:

1. Optical Front Panel MPO Connector
2. Optical Backplane MT Connector for VITA 66.5
3. No optics

1. Front Panel MPO (Female) I/O

2. VITA 66.5 Backplane MT I/O1

### Multi-Processor Multi-Core Support

The V6069 is uniquely suited for system architectures involving multiple processing cards on a common switched data plane. Specifically, the V6069 supports shared access from multiple host processors, enabling it to function as a cost-effective, high-performance gateway. This feature enables a single high-speed pipe to carry multiple virtual channels in systems that need to spread or load-balance sensor data across processor arrays.

### Complete Product Support Program

New Wave prides itself on its excellent customer support, a fact that is echoed by our customers. New Wave Design provides industry standard warranty on its products, but it is the human factor that makes our support so valuable to our customers. Our team takes the time and effort to ensure that the customer experience with our products is a positive one.

### Our Commitment

New Wave is committed to providing the latest innovations in technology, architectures, and techniques to keep our customers one step ahead of the rest. Our products, complete with the Development Framework, are intended to offer our customers an entirely unique out-of-the-box experience.

### Technical Specifications

#### NETWORK INTERFACE

Up to twenty-eight (28) 1G to 25G optical ports (front & backplane options)  
• 850nm multi-mode optics

22 lanes of electrical high-speed network I/O available to the backplane

#### OPTIONAL ADDITIONAL PROTOCOLS

Ethernet, Fibre Channel, sFPDP, ARINC 818, Aurora

#### ASoC (FPGA)DEVICE

Xilinx® Versal® VP1502/VP1702/VP1552

Contact New Wave Design for additional device support!  
Visit Xilinx® Versal® Datasheet<sup>1</sup>

#### MEMORY

3 banks of 16GB (48GB total) up to 1866MHz/3733 Mbps LPDDR4 SDRAM

#### THERMAL SENSORS

2 digital temperature sensors

#### COMPLIANCE

VITA 47, 48.2, 65, 66.5, 93

#### PHYSICAL CHARACTERISTICS

##### Dimensions:

170.75mm length: Face of carrier to back edge of Guide pin connectors  
189.22mm length: MPO flip door to back edge of Guide pin connectors  
100mm width: Edge of guide rail to guide rail  
24.64mm height: From primary cover to secondary cover

##### Weight:

<2.0 lbs

#### POWER CHARACTERISTICS

Power Draw (Max): 216W

Power Supply: 12V

#### TEMPERATURE

Operating: -40° C to 85° C (conduction-cooled)

Storage: -55° C to 105° C
